

## **A visit by a delegation of the Konkuk University in South Korea**

A delegation of the Konkuk University in South Korea visited KIT on November 9, 2016. This visit was particularly special for International Affairs because president Prof. Dr. Sang-Gi Min is an alumnus of the University of Karlsruhe and, thus, found his way back to his alma mater. In a general presentation about KIT, Pascale Kohler introduced the president to the changes in structure and organization of KIT due to the merger. The visit also included visits of institutes already cooperating with KUK. Two Korean scientists of KIT joined the delegation during their whole visit.
